

Supplementary Table 2. Major complications in the patients with pure MASLD (n=1,381)

Variables	Past history Numbers (CR)	Present history New cases (recurrence)
Liver-related events	n=19 (2)	n=77 (4)
Gastroesophageal varices/bleeding	9	17 (2)
Hepatocellular cancer	7 (2)	37 (1)
Decompensated cirrhosis	3	23 (1)
Cardiovascular disease	n=46	n=51 (4)
Coronary artery disease	34	31 (3)
Heart failure	3	5
Arrhythmia	9*	15 (1) [†]
Stroke	n=25	n=21 (4)
Cerebral infarction	17	14 (3)
Cerebral hemorrhage	6	5 (1)
Subarachnoid hemorrhage	2	2

MASLD, metabolic dysfunction-associated steatotic liver disease; CR, complete remission.

*Atrial fibrillation (n=4), atrioventricular block (n=2), supraventricular arrhythmia (n=2), unknown (n=1). [†]Atrial fibrillation (n=10), sick sinus syndrome (n=2), paroxysmal ventricular tachycardia (n=1), premature atrial contraction (n=1), unknown (n=2).
