

Supplementary Table 1. The *P*-values about difference of AUCs between LSM, LPR, and LSPS in total patients

HVPG (mmHg)	<i>P</i> -value		
	LSM_LSPS	LSM_LPR	LSPS_LPR
≥6	1.00	1.00	0.71
≥10	1.00	1.00	0.71
≥12	0.65	0.96	0.59
≥16	1.00	1.00	0.95

This table was calculated as a delong test through R package "pROC".

AUCs, areas under the curves; LSM, liver stiffness measurements; LPR, liver stiffness to platelet ratio; LSPS, liver stiffness-spleen diameter-to-platelet ratio score; HVPG, hepatic venous pressure gradient.
