

Supplementary Figure 1. The expression of bile acid-related receptors NTCP and FXR in HSCs. Amplification plot of NTCP (A) and FXR (B) expression in LX-2 cells by real-time RT-PCR. NTCP and FXR (C) mRNA levels in quiescent and activated LX-2 cells. FXR, farnesoid X receptor; HSCs, hepatic stellate cells; TCA, taurocholic acid; FBS, fetal bovine serum.
