

Supplementary Figure 3. One-month transplant-free survival rate according to the presence of AARC ACLF and dynamic changes in m-qSOFA after excluding the patients who died or received liver transplantation within 7 days. (A) Total patients, (B) Non-AARC ACLF patients, (C) AARC ACLF patients in the KACLiF cohort. (D) Total patients, (E) Non-AARC ACLF patients, (F) and AARC ACLF patients in the AARC cohort. LT, liver transplantation; m-qSOFA, modified quick sequential organ failure assessment; KACLiF, Korean acute-on-chronic liver failure; AARC, Asian Pacific Association for the Study of the Liver ACLF Research Consortium.
