
Supplementary Figure 3. Differential expression analysis and correlation analysis. (A) RNA expression analysis of four transcription factors in HCC tissues and normal tissues based on the UALCAN database. ***P<0.001. (B) Spearman correlation analysis of RNA expression levels of four transcription factors with that of *UBE2S* in HCC tissues based on the GEPIA2 database. UBE2S, ubiquitin conjugating enzyme E2 S; HCC, hepatocellular carcinoma; ns, no statistical difference.
