
Supplementary Figure 7. The interaction between UBE2S and VHL. (A) The interaction between endogenous UBE2S and VHL in MHCC-97H cells was detected by co-immunoprecipitation combined with Western blotting. (B) The co-localization between UBE2S and VHL in MHCC-97H cells was detected by immunofluorescence. UBE2S, ubiquitin conjugating enzyme E2 S; VHL, von Hippel-Lindau tumor suppressor.
