
Supplementary Figure 10. IL-1β boosts GOLM1 expression and its nuclear translocation in primary hepatocytes. (A) The effect of IL-1β on the expressions of GOLM1 and OPN in primary hepatocytes. (B) GOLM1 expression in nucleus and cytoplasm of primary hepatocytes supplemented with indicated concentrations of IL-1β. (C) IF analysis of the effect of IL-1β on GOLM1 localization in primary hepatocytes. Scale bar, 20 μm. ns, nonsignificant; **P*<0.05, ***P*<0.01, ****P*<0.005. GOLM1, Golgi membrane protein 1; IF, immunofluorescence; IL-1β, interleukin-1β; OPN, osteopontin.
