
Supplementary Figure 5. Comparison of normal chow diet (NCD)-fed ASB3HKO and ASB3fl/fl mice. (A–E) Comparison of body weight curve (A), glucose tolerance (B), insulin sensitivity (C), weight of adipose tissues, liver tissues (D) and percentage of adipose tissues and liver tissues over body weight (E) in NCD-fed ASB3HKO vs. ASB3fl/fl mice. (F) The representative western blot results and the quantitative data of CPT1A, ASB3, and GAPDH in liver tissue of the ASB3HKO and ASB3fl/fl mice treated with the indicated virus. n=3. **P*<0.05, ***P*<0.001, ns, no significance.
